

## RIAanalyst.com – **Note on Data Sources**

We pull data from a variety of sources that we deem reliable, though we make no guarantee of the timeliness or accuracy of the data. Most of our data comes from popular, trusted sources such as Yahoo! Finance, Morningstar, Stockcharts.com, Barcharts.com, and Smartmoney.com, among others. We aggregate this data and put it into our proprietary models to generate proprietary metrics, charts, summary statistics, mechanical valuations and other presentations that we hope add value for the professional investment advisor or knowledgeable independent investor. We make an effort to attribute data to its source wherever possible. Again, we make no guarantee as to the timeliness or accuracy of the data presented and you should refer to our general disclaimer before acting on any information on the site.
